

JOHN NJENGA

Nairobi, Kenya | 0757886522 | johnnjenga7852@gmail.com | johnnjenga.vercel.app

PROFESSIONAL SUMMARY

Final-year Information Technology student with hands-on experience across networking, cloud infrastructure, and full-stack development. Built and operate a production web platform on Azure and Cloudflare, with additional certified training in Hikvision CCTV and video intercom systems. Comfortable with IP configuration, LAN/WAN setup, cloud deployment, and security hardening. Detail-oriented and quick to learn, seeking an attachment or junior role spanning networking, cloud/DevOps, IT support, or security.

TECHNICAL SKILLS

Networking IP addressing & subnetting, routing, LAN/WAN setup, network diagnostics, cable management

Cloud & Infrastructure Azure App Service & Database for MySQL, Cloudflare (CDN, WAF, DNS), GitHub Actions CI/CD, Nginx

Security Systems Hikvision CCTV installation & configuration, video intercom systems, IP surveillance design

Systems & Hardware Windows OS support, hardware troubleshooting & assembly, component diagnostics

Software Development PHP, Laravel, React, TypeScript, Java, Firebase

Tools & Platforms GitHub, XAMPP, MySQL, TablePlus, VS Code, Hik-Connect, Hik-Partner Pro, Azure

CERTIFICATIONS & TRAINING

Hikvision CCTV & Video Intercom Systems - Hikvision, 2025

EDUCATION

Bachelor of Science in Information Technology

KCA University, Nairobi - Expected 2026

Relevant coursework: Network Systems Design and Management, Communication Systems and Technologies, Information System Security and Cryptography

KEY PROJECTS

MtaaniFix - Local Home Services Marketplace | Laravel, MySQL, Azure, Cloudflare, Flutter

- Architected and deployed a production marketplace connecting clients with verified local tradespeople, hosted on Azure App Service with Cloudflare CDN and M-Pesa payment integration
- Migrated the production database from Aiven to Azure Database for MySQL Flexible Server and hardened security through Cloudflare WAF rule tuning
- Optimized backend performance, cutting page load time from ~2.8s to ~83ms, and built a CI/CD pipeline with GitHub Actions
- Developed a companion Flutter mobile app for iOS and Android

Freelance Security Assessments | Burp Suite, Nmap

- Performed external security assessments for East African SaaS companies, covering reconnaissance and vulnerability testing, and delivered findings through responsible disclosure

SiteGrid - Workforce & Site Operations Management System

- Designed and built a cloud-based platform managing casual and periodic labour across multiple sites, including onboarding, attendance tracking, and automated wage calculation

Kenswed School Management System (KSSMS)

- Contributed multi-role modules - library management, push notifications, authentication - using PHP and PDO

Real Estate & Property Discovery Platform

- Built a web platform using Firebase and Google Maps API for landlords and tenants to discover and list properties

ADDITIONAL STRENGTHS

Fast learner • Strong problem-solving ability • Collaborative team player • Effective communicator • Reliable and disciplined
